NON-GENUINE / COUNTERFEIT

STIHL genuine oils are only sold at Authorized STIHL Dealers. Avoid purchasing STIHL oils at Non-Authorized locations. It is important that you purchase from our trusted retailers.

WHY YOU SHOULD NOT PURCHASE COUNTERFEIT OILS?

WARRANTY

Non-Authorized retailers of counterfeit oils do not operate within the regulatory framework established for authentic STIHL products, therefore there is no accountability for product safety, labelling accuracy, or fair trade practices.

The use of these counterfeit oils can void your manufacturer equipment warranty.

EQUIPMENT DAMAGE

Catastrophic damage or premature wear and tear may be direct results of using counterfeit oils in your equipment. These oils may lack proper lubricating properties that can cause irreversible damage leading to breakdowns, downtime, and costly repairs or replacements.

QUALITY CONCERNS

Counterfeit oils often lack the quality standards maintained by Authorized Retailers and may contain impurities, and/or improper formulations that may undermine the integrity of your equipment.

Genuine STIHL oils undergo rigorous testing and quality checks to ensure they meet safety standards.

UNRELIABLE PERFORMANCE

Counterfeit oils may lack the proper viscosity or corrosion-resistant elements required for specified applications which can result in reduced productivity, decreased efficiency, and compromised safety.
